

Advance-Nilfisk Parts

Advance-Nilfisk Parts - Think about how long and tiresome it will really be to clean-up after a party, with no help from machines. Previously, the dirt from carpets and upholstery had to be beat out of them by hand; cleaning cloths, brooms, and brushes were the best cleaning products at the time.

The founder of Nilfisk-Advance, P.A. Fisker, started out as an electrical engineer who liked to work on electrical motors. After starting his company in the year 1906, he began to produce motors to drive fans, machine tools, drills and coffee grinders. Mr. Fisker's dream from the beginning was to have an international business selling products worldwide.

The Nilfisk C1 was a remarkable breakthrough for the cleaning business. This ground breaking vacuum cleaner, invented by Mr. Fisker, weighed just 17.5 kilos and can be operated by a single individual. This invention came in a time where various cleaning equipment were massive and required 4 or more operators, thus, the Nilfisk C1 changed everything and developed the method we clean forever. The mastermind behind these very first cleaning machines remains unparalleled. Cleaning equipment provide an excellent solution to an existing problem; things get dirty and have to be cleaned frequently, without a lot of effort.

Gradually but steadily, Nilfisk-Advance grew through the decades. In the 1980s, this expansion really occurred when the business became a part of the NKT Group. Their new owners' ambition and concentration made Nilfisk-Advance take a huge leap forward within the industry, aspiring to be among the leading universal players in the market of professional cleaning machines. Nilfisk-Advance is now represented in every part of the world due to steadily acquiring numerous smaller businesses in order to develop their product portfolio and presence in new markets. They are proud to present a range of cleaning solutions to fit each need.
